Psychotherapy With Sexually Abused Boys: An Integrated Approach

Interpersonal Violence: The physical and emotional impact of abuse on its victims and the factors affecting recovery. With personal case histories of victims...

A long overdue book by a psychologist who has extensive clinical experience treating male victims of child sexual abuse, Hunter examines the physical abuse of male children is rare, or that the consequences are less serious than for girls. Hunter explores in-depth explorations of various consequences of sexual abuse, including sexual addiction, profound depression, gender dysphoria, eating disorders, self harm, suicidal ideation, and dissociation.

While the psychotherapeutic world has made significant strides in documenting the treatment of women victims of sexual abuse, little is known about the nature of therapeutic responses to men. This may be understood as being partly due to the reluctance of male survivors to discuss their experiences.

The Use of the Creative Therapies with Sexual Abuse Survivors

Dr. Stephen Prior's Object Relations in Severe Trauma offers unique insight into the suffering and treatment of seriously traumatized children. It outlines an object relational theory of the consequences of sexual traumatization as well as a detailed portrait of breaking the silence in the face of child sexual abuse.

Breaking the Silence

Drawing on their experience as practitioners, the authors explore the reactions which children commonly experience following sexual abuse. They emphasize the importance of relationship and explore its impact on the therapist. Their approach is creative and personal. The book contains poems and exercises that promote empathy with the child's perspective.

Boys Who Have Abused

The debate over the validity of memories related to childhood sexual abuse continues. However, whatever one's beliefs about the occurrence of such memories, there are some points upon which most people can agree: that there are children and adolescents who have been abused; that these children ought to receive treatment; and that such treatment should be provided in an integrated and sensitive manner. The contributors to this volume are dedicated to providing such treatment. The book describes treatment innovations for working with both child and adolescent survivors and perpetrators of sexual abuse. Among the topics explored are inpatient treatment of adolescent survivors and societal responses to sexually aggressive children.
